BUILDING MORE THAN BRICKS AND METAL, BUILDING OPPORTUNITIES

Opportunities Inc. held a Ribbon Cutting Ceremony on Oct. 28, 2010 to celebrate the completion of its first phase of the remodel and renovation building advancement that began this past spring. We are proud to announce the new 'bricks' of our organization: the plant one building now has a new loading dock, expanded production and warehouse space, a larger Print Services department, innovative accessibility, and newly implemented "Going Green" environmental processes. The enhancement of Opportunities' concrete and beams immediately impacts the service delivery for over 1500 individuals and businesses who partner with Opportunities, Inc. on annual basis. In addition, it has the potential to reach even more community members and organizations as the renovation project continues through fall of 2011. Phase II of the Building Opportunities project is in progress and we look forward to continued growth and to continue to harden our mold within the community.
